

Announces Our Official
POS Vendor Partner...

Wireless Sales Management System

www.wsmspos.com

"Designed by a wireless dealer
for wireless dealers"

WSMS Point of Sale
offers a complete set of
tools to turn your PC
into a sophisticated sales
management system.

Eliminate costly sales errors.

- "Order entry wizard" only allows properly linked, phones, rate plans and dealer codes
- Item master detail insures proper pricing

Get paid for each and every activation commission that you are entitled to.

- "Three tier reconciliation" insures that you are paid activation commission for every activation generated by the POS

Make sure you have the right inventory on hand.

- Min and max "reorder points" notify you when items are needed

Easily calculate your salesperson commissions.

- Prints monthly commission reports based on your sales compensation plan

Simplify your daily bank deposit.

- "Daily transaction log" totals checks and credit card receipts for the day
- Reconciles cash drawer
- Customer "deposit tracking"

Quick & accurate item scanning.

- Bar code readers used for both inventory tracking and invoice searching

Minimize Data Entry and Accounting Costs.

- POS send line item transaction detail to QuickBooks
- Integrates invoicing, payments, payroll and purchase orders with QuickBooks

Reduce inventory shrinkage.

- ESN tracking traces phones from initial receiving until commission reconciliation
- Inventory tracked by location including in-transit
- Simple store to store transfers

Reduce employee training expense.

- Intuitive order entry wizard allows people with no prior experience to sell phones, airtime plans and accessories that work together, all at the right price

Accurately track employee hours.

- Required log-in shows start time
- Scheduled log-out matched work schedule
- Exceptions are noted

Automate returns process.

- Manufacturers RMA forms are electronically loaded in the system
- Original invoice populate most required field
- RMA prints with history report, original invoice, return invoice and RMA form

Remotely track activities in multi-store operations.

- Internet based communication link allows reporting from anywhere at anytime

Manage customer relationships to increase sales.

- Detail transaction reporting allows you to make offers to existing customers based on items purchased and date ranges
